Amberol M

Metallurgy › FLUXING ADDITIVES

GENERAL INFORMATION

Low-foaming mixture for use as a wetting agent in flux baths, designed for HDG.

PROPERTIES

Amberol M is a mixture of appropriately selected components with a wetting effect in the fluxing process. Its action increases adhesion and uniformity of flux distribution on elements, thanks to which the zinc layer adheres uniformly and closely adjacent to the surface of the steel parts.

APPLICATION

The product is a concentrate added to the flux bath in dilutions of 0.15 ÷ 0.30%.
