

Acidol® PS

Metallurgy > DEGREASERS

GENERAL INFORMATION

Acidol® PS is an acidic degreasing concentrate for bath steel degreasing, designed for HDG.

PROPERTIES

Acidol® PS is based on inorganic acids and appropriately selected non-ionic surfactants as well as functional additives. Thanks to its acids' content it allows removing of ferrous oxides and provides gaining uniformly degreased and clean surface. Thanks to the use of appropriate technology, it ensures long-term use of the working bath.

APPLICATION

By immersion, preparing a solution of 1-4% by volume (V/V) of the product in water. Proper mixing, and thus the quality of degreasing can be achieved, for example, by sparging the working fluid. The concentration should be selected depending on the degree of greasiness / corrosion of the steel parts.

The information contained in this document is provided in good faith, based on our current knowledge and experience. We reserve the right to make changes as a result of technological progress and product improvements by the manufacturer. The suitability of the product for the intended use should be verified before use. All information, including technical support, is provided without any warranty and may change without notice.
