

# Amberol DOS

Mining > WETTING AGENTS

## GENERAL INFORMATION

Coal dust wetting agent.

## PROPERTIES

The use of the concentrate effectively reduces the movement of coal dust and limits the possibility of its explosion, thus contributing to a significant improvement in work safety and the health of employees working underground.

## APPLICATION

Amberol DOS is intended as an additive to water for wetting and limiting the spread of dust during work related to mining and transporting coal in places where it is formed and settled in underground mine workings using dosing pumps or aggregates. In mining plants, Amberol DOS can be used for: spraying zones in heading excavations, washing the ceiling and sidewalls in underground mine workings, spraying zones near longwall shearer and road headers, spraying transfers, wagons, etc.
