

Degramet® MB

Metallurgy > ADDITIVES FOR ACIDIC BATHS

GENERAL INFORMATION

Supporting additive for pickling baths based on HCl.

Bath repair.

Reducing the amount of hydrochloric acid vapors.

PROPERTIES

Degramet® MB is a mixture of appropriately selected non-ionic surfactants and supporting additives, with emulsifying action in immersion degreasing of steel in acidic solutions.

Specially developed to remove even the most stubborn dirt. Also used occasionally to repair the bath - an addition of about 0.25-0.50% causes emulsification of even the most stubborn grease.

APPLICATION

An agent for use as an oil emulsifier and reducing the amount of hydrochloric acid vapors.

Improves the wetting ability of the pickled surface, thus contributing to increased efficiency of iron oxide dissolution. Increases the life of pickling baths.
