

Emulic HTHP

Drilling > oilfield drilling lubricants

GENERAL INFORMATION

Primary emulsifier and lubricant for inverse drilling fluids.

PROPERTIES

Resistant to high temperatures and pressures occurring during inversion temperature work. Excellent properties of lubricating inversion fluids using Emulic HTHP allow drilling directional and horizontal connections and enable reduction of torque and friction resistance. The product provides fast drilling, extension of drill bit working time and reduction the adhesion of drilling pipe to filter cake on the borehole wall.

APPLICATION

Emulic HTHP is an excellent lubricant as well as an emulsifier for mineral oils used in inverse drilling fluids.
